- ◆ In March 2014, the PMR created a new participant category – **The Technical Partner** – for countries that are in the process of designing and implementing a carbon pricing instrument and seek technical support. **Kazakhstan** is the PMR's first Technical Partner
- ◆ Observer countries: France, Italy, New Zealand, Poland, Singapore, and South Korea

PMR Implementing Participants are building “readiness” for a range of domestic instruments aimed at putting a price on carbon

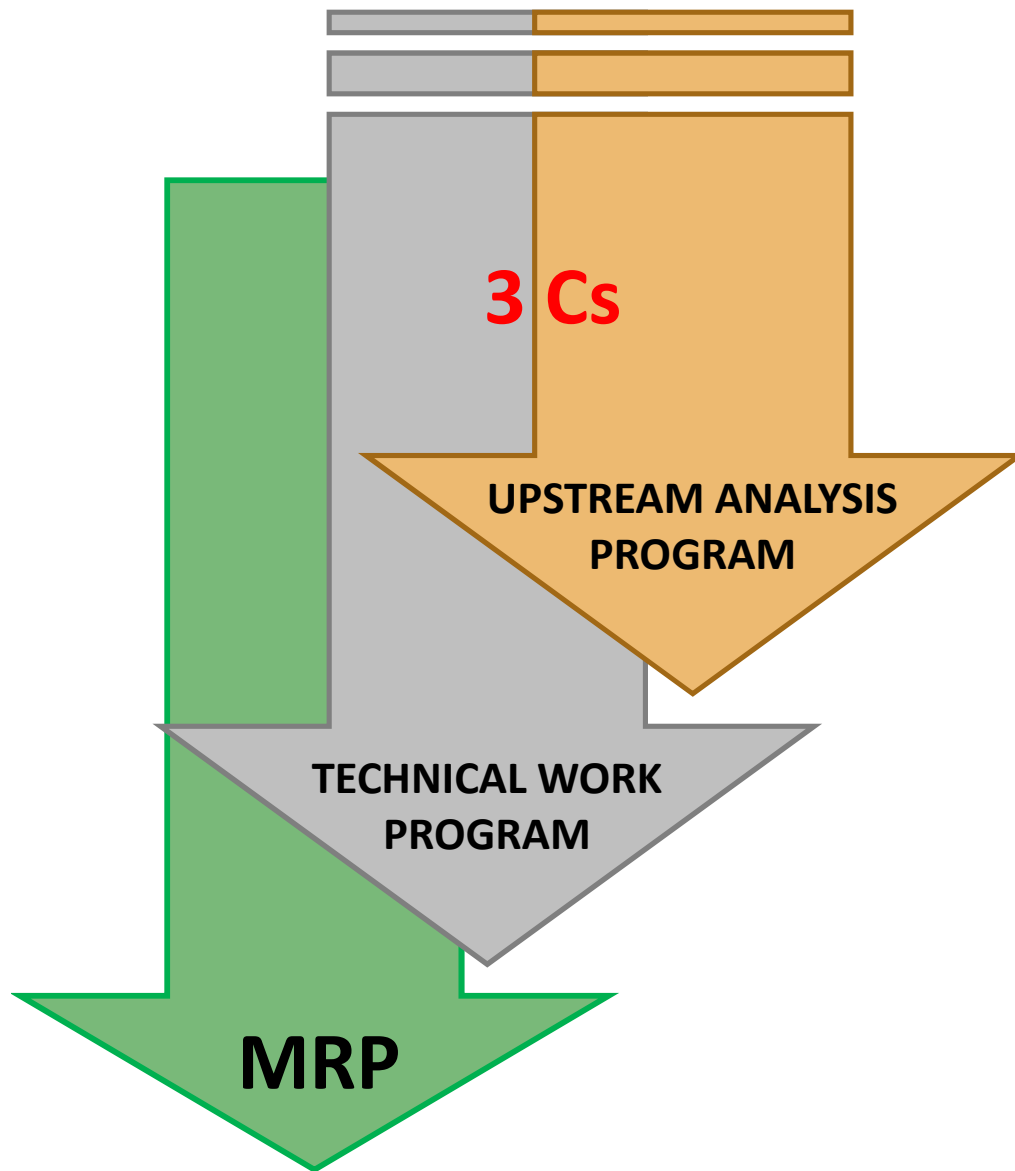

◆ Building foundations

- Developing Monitoring, Reporting, and Verification of GHG emission (MRV)
- Strengthening analytical capacities for mitigation objectives and policy options

◆ Design and implement domestic carbon pricing policies

The PMR supports the emergence of Credible, Consistent, and potentially Compatible carbon pricing frameworks across countries (3Cs)

- ◆ **Country-level Readiness**

Build the foundations, design and implement carbon pricing policies

- ◆ **Upstream Policy Work Analysis**

Assess policy options and identify effective and cost-efficient instruments for post 2020 mitigation scenarios

- ◆ **Technical Work Program**

Complement country-level implementation activities by supporting ground work on MRV, registries, baseline setting, and offsets

- ◆ **Private Sector Preparation**

Facilitate business-Government Dialogue and companies' readiness

Activities of the PMR Work Programs on MRV, Registries and Data Management Systems
