

***RESULTS-BASED CLIMATE FINANCE DIALOGUE***  
***EXPLORING WAYS FOR RESULTS-BASED CLIMATE FINANCE TO DELIVER TRANSFORMATIVE LOW***  
***CARBON AND CLIMATE RESILIENT DEVELOPMENT***

JUNE 2, 2015, WORLD BANK OFFICE, 66 AVENUE D'IÉNA, PARIS, FRANCE

## **BACKGROUND**

Results-based finance is not a new approach in international cooperation. It has a history in development finance, in particular in the health and education sector. In international climate finance the approach is most advanced for REDD+ but also used under existing carbon market instruments, in particular the CDM, within some piloting initiatives.

However experiences with results-based climate finance (RBCF) remain limited and neither the potential of the approach, the areas for application, the funding and implementation requirements, nor the limitations and challenges are sufficiently understood.

This dialogue event on RBCF intends to address these knowledge gaps and contribute to a better understanding of RBCF of implementers, finance providers and private business. It builds on a first expert consultation held on October 23, 2015 in Frankfurt, Germany.

## **OBJECTIVES AND STRUCTURE OF THE DIALOGUE**

Part 1 will discuss the rationale of RBCF, profile the instrument, its potential and the scope of application. This will be based on new analytical work but also on experiences with existing RBCF initiatives. Key topics are: potential role of RBCF to support INDC implementation, potential to mobilize private finance, alignment of climate and development finance, potential role of RBCF to price carbon and to build carbon markets.

Part 2 offers a case study of one selected initiative: the Pilot Auctioning Facility (PAF) implemented by the World Bank. Both first experiences with the PAF approach as well as first results from an assessment of its further potential will be presented and discussed.

Part 3 will look into challenges of implementation such as institutional and technical capacity, MRV methodology and infrastructure, and upfront financing. Based on concrete cases response strategies to these challenges will be discussed.

Part 4 will focus on the upfront financing barrier, assess the existing experience and discuss the potential of new innovative approaches to pre-finance results-based payments.

This event will be held as a roundtable discussion.

Participation in the meeting is by invitation only.
