Status of the technical work in support of post 2020 mitigation scenarios

Ministry of Finance - Brazil
Technical Meeting: Approaches and Tools to Setting Mitigation Scenarios

September/2014
Domestic process and status of the preparation of the “Intended Nationally Determined Contribution” (INDC)
Public consultation process about national commitments after 2020

Objective and scope:

- The Ministry of Foreign Affairs is conducting public consultations in order to support the preparation of the Brazilian position about the “Nationally Determined Contribution” for COP-21
- The scope of these consultations do not include neither the National Policy on Climate Change nor its instruments, i.e. the sectorial plans

Methodology:

- **First phase:** Questionnaire answered online - from May 26 to July 22
- The questionnaire was addressed to different stakeholders, such as academics, business sector and civil society and received 200 replies
- Other ministries contributed to the preparation of questions and will participate to the analysis and the consolidation of responses
- The preliminary results indicate some points of convergence, like the need for conciliating climate change policies and sustainable growth and social inclusion
Public consultation process about national commitments after 2020

- **Methodology:**
  - **Second phase:** new round of electronic consultations and meetings - from August 25 to November 23
  - A new questionnaire was circulated in order to call for additional detail to the answers received during the first phase
  - Additionally, the Ministry conducted meetings with the different stakeholders to present and discuss the results of the consultations
  - Deadline for the final report is April 2015

- The whole process is aimed at supporting the Federal Government decision making, which will also take into account the results of technical studies, such as the IES-Brasil and GEF Projects
On-going Technical Work
Main projects

- **PMR** - Macroeconomic assessment of price-based instruments to implement a voluntary national Emission Reduction target in Brazil – BeGreen Model (PMR preparatory phase)
  - Concluded

- **IES** – Brasil: Social and Economic Impacts - Mitigation of GEE scenarios on 2030 and 2050
  - In progress

- **GEF Project**- Mitigation of Greenhouse Gases Options (GHG) in Key sectors of Brazil
  - Sponsored by Global Environment Facility (GEF), executed by MCTI/PNUMA
  - In progress
Thank you!
