

Coverage: Choice of sectors and GHG coverage under an ETS

**Gobierno
de Chile**

**Partnership for Market Readiness
Technical Workshop
Domestic Emissions Trading**

**Ignacio Fernandez
Ministry of Energy, Chile**

March 12, 2012

Trying to answer the questions...

Since Chile is still in the research process, most/all of these answers will only be available by the PMR baseline studies and the subsequent (pilot) project.

Nevertheless we are working in one of these items...

- What are the key design features on coverage and scope?
- Criteria design
 - Technical criteria
 - Indicators (examples)
 - GHG National Inventories
 - Marginal cost of reduction (sectoral, technology, etc.)
 - Political criteria
 - Interaction of public policy and political aspects
