

Ministry of Economic Affairs  
and Climate Policy

# NDC Partnership

Kim Solberg – Netherlands Ministry of  
Economic Affairs and Climate Policy

# Facts

- > The NDC Partnership was launched in 2016 as a global coalition of countries and institutions collaborating to drive transformational climate action through sustainable development.
- > The NDC partnership currently has 129 members
  - 94 countries
  - 23 institutions
  - 12 associates
- > It is governed by a steering committee and 2 co-chairs
  - Netherlands
  - Costa Rica

# How the NDC Partnership works

- › The NDC-P works to fast-track climate and development action through Country Engagement and Knowledge and Learning.
  - Country engagement: direct engagement with ministries and other stakeholders to advance NDC implementation.
  - Knowledge and learning: access to knowledge resources & building a peer community in NDC implementation.
  - Finance: in-country support to mobilize public and private finance, including through mobilization strategies and support for investment prioritization.

# The NDC Partnership operates within a global context

## What the NDC Partnership can offer

- › Technical assistance, capacity building and financial resources in over 40 developing countries for:
  - effective implementation of current NDCs
  - increasing ambition in updating of NDCs
- › Development of Partnership Plans to identify climate priorities and match them with partner resources.
- › Whole of government and whole of society approach
  - Integration of climate in development plans and budgets
  - Involvement of stakeholders from across the society

# Support in four thematic areas

- 1. Mobilizing climate action across government and society:** from stand-alone documents to NDCs integrated in national policy and planning.
- 2. Integrating development and climate action:** countries are seeing the benefits of a broader approach that integrates climate action within the broader SDG agenda.
- 3. Mobilizing climate finance and support:** turning NDCs into concrete investment plans and aligning budgets with climate action.
- 4. Raising country climate ambition:** support with implementation is enabling countries to identify more action and accelerate timelines.

# In-country engagement process

## Example: Vietnam

- › Involvement led by Ministry of Natural Resources and Environment and Ministry of Planning and Investment.
- › Viet Nam's Plan for Implementation of the Paris Agreement (PIPA) is the basis for its NDC implementation.
- › With support of the NDC Partnership Viet Nam has developed results indicators to track implementation progress.
- › Support was also provided to map out priority needs for financing the PIPA.
- › This gap assessment led to the identification of priorities for support and subsequent support from 13 NDC-P partners.

## Relevance to the PMR

- › Overlap in membership of NDC-Partnership and PMR.
  - › Support for implementation of NDCs.
  - › Involvement of ministries of planning and finance.
  - › Knowledge sharing and learning.
  - › Demand-driven and in-country support.
  - › Specific measures vs broader approach to implementation.
- Embed PMR activities in NDC implementation.
