

Exercise: Building a Policy Analysis Program Together

Emelia Holdaway
Manager, International Climate Change Policy
Ricardo

PMR Technical Workshop on *“Post-2020 Mitigation Scenarios and Carbon Pricing Modelling”*
Brasilia, Brazil
February 1st-3rd, 2016

Objectives of the exercise

- ◆ Identify a long-list of modelling questions/issues that could be potentially included in the PMR's Policy Analysis program (both country-specific and cross-country)
- ◆ Prioritise the key modelling questions/topics that should be included in the PMR's Policy Analysis program

Scope of the PMR Policy Analysis program

Two core pillars:

- ◆ Policy mapping, analysing policy interactions, and building policy packages
- ◆ Strengthening modelling, related to carbon pricing

Cross-cutting activities across the pillars:

- ◆ Country-level support
- ◆ Program-level knowledge creation and exchange (cross-country)
- ◆ Capacity building and training

What topics do you think should be the focus of the PMR Policy Analysis Program?

Step 1: Using the **blue** sticky-paper, please provide your suggestions for the below (one sticky-note per suggestion)

For your country:

Which specific modelling questions or issues are still outstanding or for which further work or support would be helpful?

Step 2: Using the **yellow** sticky-paper, please provide your suggestions for the below (one sticky-note per suggestion)

For the PMR 'Policy Analysis Program' work stream:

For which topics could there be benefits in further cross-country cooperation and 'deep dive' via the PMR?

Please hand in your sticky-notes to Emelia by lunch time!

Thank You

EMELIA HOLDAWAY

Instructions for the exercise:

- ◆ **Step 1:** Split into sub-groups.
- ◆ **Step 2:** Using the flipchart provided, within your sub-group brainstorm the list of modelling questions/issues that are outstanding, require a ‘deep dive’ or for which there could be benefits for further cross-country cooperation via the PMR. (Pierre- please do say in case there is a better way to frame this step).
- ◆ **Step 3:** Present to the plenary.
- ◆ **Step 4:** Use your three sticky dots to ‘vote’ for your preferred questions/issues to be included in the PMR’s modelling work program
