CARBON PRICING & MARKETS

In NDC Partnership Action Plans

- **12 NDC Partnership member countries** have made a total of **24 Action Plan requests** for support to implement carbon pricing and markets
- Sector-specific requests focus primarily on mitigating emissions in the **FOLU** and **Energy** sectors
- **79% of these requests** have received confirmed technical assistance from 15 development or institutional partners; 5 requests remain unsupported
- **6 countries** request support related to Article 6: Burkina Faso, Georgia, Mozambique, Nigeria, Pakistan, and the Philippines
- Only **3 countries** (Burkina Faso, Mozambique, and STP) make requests specifically to build ministerial capacity to implement these mechanisms.

EXAMPLE REQUESTS

Developing Institutional Capacity

Burkina Faso has received confirmed support from the **World Bank** to organize an information and training workshop on the links between carbon market, NDC and Article 6 and on the opportunities of Burkina Faso to attract private carbon investors. The activity will support Burkina Faso's Forest Carbon Partnership Facility project which is aimed at reinforcing institutional capacity to coordinate the country's REDD+ readiness process.

Sao Tome & Principe received confirmed support from the **FAO** to build national capacity in the principles and practices of Forestry and Landscape Restoration (RFP), and in the use of ecosystem services and RFP financial instruments. The FAO will support STP to conduct an evaluation study on the National Fund for Forestry Development of STP (NFFD) and its planned scheme of benefits and tax incentives. Recommendations for its improvement will be delivered.

EXAMPLE REQUESTS

Article 6

Mozambique has received confirmed support from **7 partners** to provide technical trainings to technicians from the sectors involved in NDC in the formulation, management and reporting of projects related to climate change. The country aims to ensure 30 technicians have knowledge of market mechanisms defined by Article 6 of the Paris Agreement.

Nigeria had received confirmed support from **Natural Eco Capital** to establish a legal and institutional framework for implementing carbon markets defined by Article 6, including transparency guidance, domestic approval process, definition of crediting baselines, and conditions for Internationally Transferred Mitigation Outcomes (ITMOs).
