CLIMATE  
RESILIENT  
PROJECTS**

Policy dialogue to support National / Sub-national coordination

# A wide range of financing approaches to support local government climate action

- ❑ Sovereign loans or grants for the development of policies to support the urban climate agenda
  
- ❑ Financial intermediation and green credit lines to incentivize the engagement of national or regional financial institutions, allowing for:
  - access to local currency funding
  - aggregation of smaller projects
  
- ❑ Blended finance solutions through the mobilization of resources from the EU Facilities or from the Green Climate Fund to finance urban climate infrastructure and climate action
  
- ❑ Direct loans to local governments (with/out state guarantee) :
  - to fund local governments' climate investment projects or
  - to provide budget support to finance local government's climate strategies and investment programs
