Technical Work Program

Activities completed since PA20
Three day training on designing and implementing carbon taxes held in Ivory Coast on 9-11 October.

Exploring further opportunities to deliver training beyond PMR countries in collaboration with UNFCCC - CIACA

Please contact the PMR Secretariat if such training would be of interest!
TRAINING ON COMMUNICATING CARBON PRICING HELD FOR LATIN AMERICA

Two-day training course for policymakers and communications specialists held in Costa Rica on 10-11 October, 2019.
NEW PUBLICATION: USING CARBON REVENUES

The report provides practical guidance on using carbon revenues by helping policymakers understand the implications, opportunities, and challenges associated with different approaches to carbon revenue use.

Report launched at Latin America Climate Week

Webinar to be held in November 2019
At PA21, a workshop was held on the sustainable development co-benefits of carbon pricing.
Technical Work Program

Activities underway
UPCOMING PUBLICATIONS

Carbon pricing selection
Co-benefits of carbon pricing
Measuring emissions
Crediting Guide
Update ETS Guide in partnership with ICAP
Carbon pricing governance
E-COURSE: CARBON TAX

E-course on designing and implementing carbon taxes based on the Carbon Tax Guide. The course has been developed in partnership with UNITAR. The course can be facilitated by a carbon tax expert or taken independently by users.

Course will be complete on 30 October 2019. Course will launch with a facilitated version in February 2020.
REGIONAL TRAININGS: COMMUNICATING CARBON PRICING

Two-day training course for policymakers and communications specialists to provide in-depth training on communicating carbon pricing. Two more regions to go:

1. Asia
2. Eastern Europe/Middle East/Africa
TECHNICAL WORKING GROUPS – Plan for 2020

ETS Working Group

Provide input to the ETS Handbook update:
1. Review the outline (January 2020)
2. Review draft report (~June 2020)

Crediting Working Group

Provide input to the Crediting Guide:
1. Review the outline (October 2019)
2. Review draft report (~June 2020)
Technical Work Program

Activities under consideration
ACTIVITIES UNDER CONSIDERATION

• Voluntary markets
  • Consult with 3 PMR implementing countries to see how different potential models for the future voluntary market would work. Investigate the challenges and preferences of different models to help determine how the voluntary market could work after 2020. This will also help build the capacity of countries to take advantage of market opportunities in the future.

• Role of financial institutions in ETS – will be included in ETS Handbook update

• Distributional impacts of carbon pricing – investigating potential scope

Feedback from PMR members welcome!
Policy Analysis Work Program

Update on activities
STATUS OF ACTIVITIES

• Policy analysis work in Vietnam has been completed.

• Project in Thailand expected to be complete by end December 2019.

The project in Thailand supports carbon pricing policy choice through economic modelling of the impact of carbon pricing options.

The project in Vietnam is undertaking policy mapping and economic modelling to support the development of the Roadmap for GHG Mitigation in the energy sector up to 2030.
Thank you
